

I think that the mode cw is much in the need of being abolished, its outdated, and not only that but no one ever uses it anymore. i check daily to see if all the amateurs that say they use it are really on the band, guess what they are not there! seems like they just want to create a crisis on this matter, but as for me i just want everyone to accept that the mode cw is outdated and no longer needed, so why hang on to something when theres so many other modes of operation to enjoy..
